PROFESSIONAL SUMMARY

SKILLS

Data Analyst with 5+ years of experience in data intelligence and consumer insights. Skilled in SQL, Power BI, Excel, and Python for reporting and analysis. Built dashboards that cut ad-hoc reporting requests by 30% and lifted client satisfaction by 20%. Known for turning raw data into clear, actionable insights for business teams.

- Python (Scikit-learn, PyTorch, XG-Boost, Pandas)
- SQL (Snowflake, Oracle, PostgreSQL)
- Microsoft Power BI, Excel (Advanced)
- ETL & Data Pipelines
- Statistical Analysis (Regression, A/B Testing)
- Stakeholder Reporting & KPI Dashboards
- Azure, Databricks

WORK EXPERIENCE

Full-Time Employment, Service Sector

Dec. 2024 – Feb. 2026

Toronto, ON, Canada

- Maintained continuous full-time employment while pursuing Microsoft **Fabric Analytics Engineer (DP-600)** certification and maintaining technical skills through independent data projects.

Computer Vision Developer Internship

Mar. 2024 – May 2024

Jumio Corporation — Remote (Toronto, ON)

- Document Analytics - Employing machine learning, and Computer Vision Models based on Transformer architecture to examine government-issued identification documents (such as driver's licenses, identity cards, or passports) involves analysing the document's layout based on predefined specifications.

Junior Data Scientist Internship

Feb. 2024 – Apr. 2024

Magnify Access Inc. — Remote (Toronto, ON)

- Developed AI models for workplace accessibility using Python (PyTorch, Scikit-learn).
- Tested 3+ model approaches and documented findings for the engineering team.

Data Analyst / Specialist

Jan. 2020 – Dec. 2022

GfK NielsenIQ — Delhi NCR

- Cleaned and validated large-scale digital market datasets of 50,000+ records/week with 95%+ accuracy, ensuring data integrity for downstream client reporting.
- Applied SQL and Python to define and track key business metrics, driving a 20% increase in client satisfaction.
- Analysed market trends, consumer behaviour, and competitive positioning to advise 12+ distributor and retail clients on pricing and promotional strategy
- Created Power BI and Excel dashboards, sustaining 95%+ on-time report delivery across client projects.
- Applied clustering, classification, and regression models to consumer research data to predict outcomes of new product and marketing concept tests
- Supported the Oracle to Azure cloud migration, improving database efficiency by 18% and cutting processing time by 50%.

Finance & Admin Business Associate

Jul. 2018 – Jan. 2020

IBM — Delhi NCR, India

- Analysed sell-in and sell-out data from distributors across EMEA, APAC, and LATAM to track product performance, identify market trends, and forecast customer demand, informing regional business decisions.
- Conducted market and product research across 10+ projects, gathering and cleaning large datasets from multiple sources to surface customer behaviour, market patterns, and client requirements.

- Managed a master database through SQL-based ETL processes and validation checks, maintaining 98%+ data accuracy across deliverables.
- Built reports and dashboards in Excel, SharePoint, IBM Cognos BI, and SQL, delivering 8+ standardized monthly reports and cutting report turnaround time by 25%.
- Partnered with cross-functional teams to resolve data quality issues (tracked via JIRA) and evaluate distributor channel performance, identifying underperforming markets and proposing strategies that supported product launch success

Associate IT

Oct. 2016– Apr. 2017

Corporate Executive Board (Gartner) — Delhi NCR, India

- Collected and analyzed data from 12+ vendors, presenting findings to guide strategic decisions.
- Delivered HR insights for 8+ enterprises, identifying management needs to improve operations.

EDUCATION

Post Graduate Certificate, Predictive Analytics

May 2023 – Dec. 2023

Conestoga College, Ontario, Canada

Bachelor's Degree, Engineering

Aug. 2012 – Aug. 2016

Dronacharya College of Engineering, India

PROJECTS

- **Supermarket Analysis (Market Basket):** Analyzed Canadian supermarket transaction data to uncover product associations and buying patterns, supporting cross-selling and product placement decisions.
Skills: Power BI, Excel (Clustering, Regression, Time Series, Apriori, Decision Tree)
- **Energy Consumption (PJM Energy):** Analyzed PJM energy consumption data using statistical and time series methods in Python and R to uncover usage patterns and support planning.
Skills: Python, R, Statistical Analysis
- **Huntington Disease (Community Project):** Partnered with the Huntington Society of Canada to forecast event revenue and expenses supporting disease research funding.
Skills: Python, Excel, Power BI
- **US Employment History (Community Project):** Analyzed historical US unemployment data to identify long-term trends and patterns.
Skills: Python (Pandas, NumPy, Scikit-learn, Seaborn)
- **EDA US Accidents (Community Project):** Explored 2016–2021 US accident data to identify trends in frequency, severity, and location, informing road safety insights.
Skills: Python, Power BI

CERTIFICATIONS, ACHIEVEMENTS, LEADERSHIP & VOLUNTEERING

- Volunteered with BHUMI, teaching under-privileged children and promoting gender equality awareness.
- Member of Toastmasters International, Charter member of Capital City Toastmaster.
- Certified **Microsoft Azure AI (AI-900)**, certification number: **F8DA8A-51542D**
- and pursuing **Microsoft Fabric Analytics Engineer (DP-600) & AWS Certified Machine Learning Engineer Associate (MLA-C02)**.
